NEOFORCE LAUNCHES INFANT MRU™ (MOBILE RESUSITATION UNIT)

IVYLAND, PA USA: WEDNESDAY, SEPTEMBER 16, 2010. NeoForce is proud to introduce the MRU™ system which combines the NeoPIP™ T-Piece resuscitator with a convenient mobile stand. Intended for emergency manual resuscitation of infants, the MRU™ is a flexible and highly configurable platform that allows caregivers to bring all the devices, accessories and consumables to the bedside in an organized and controlled fashion. “Finally we have a mobile solution to meet our customers resuscitation needs in an environment where space is at a premium”, stated Otho Boone, President of NeoForce Group. “The MRU allows caregivers to reduce the number of products needed to cover a nursery thus reducing clutter at the bedside”, continued Boone.

The MRU is available now. Contact your local NeoForce representative or visit our website at www.neoforcegroup.com for more information or to place an order.
